

Prices SANE audits worldwide 2022

SANE is a certification, based on the idea to **acknowledge pre-existing certifications**. The standard supports low-impact materials, emphasizes living wage aspects, and offers clients who have no previous certification experience possibilities to show their sustainability efforts in a **consumer-engaging way**. As a certification body, we are able to offer worldwide digital, on-site, and resource-conscious audits for SANE. The following prices and timelines are meant to be understood as guidelines. Final offers may differ.

Administration and certification review fee per unit: 400 Euro

Audit activities:

850 Euro per full-day audit, remote or on-site

480 Euro per up to half-day audit remote

Travel time will be compensated. Multiple day audits will be calculated per case. On-site audits are counted as full working days. This position covers the planning of the audit, the audit, report writing, and potential NC correction loops.

Travel costs: depending on the location, duration, and connection availability. Generally, we are environmentally conscious, traveling by train within Germany, trying to combine audit travels if practicable, and offering remote audits where possible.

SANE covers the compliance of a company as a whole and can be used for full supply chain transparency. Unlike with other certifications, clients who want to label items as SANE can get **labels and matching marketing materials** anytime directly from the standard holder. The current costs are **0.5%** of the estimated retail price per item. This makes SANE especially attractive for fashion brands and units with flexible production volumes.
